

When the window is **Giuditta**[®] all the others look alike

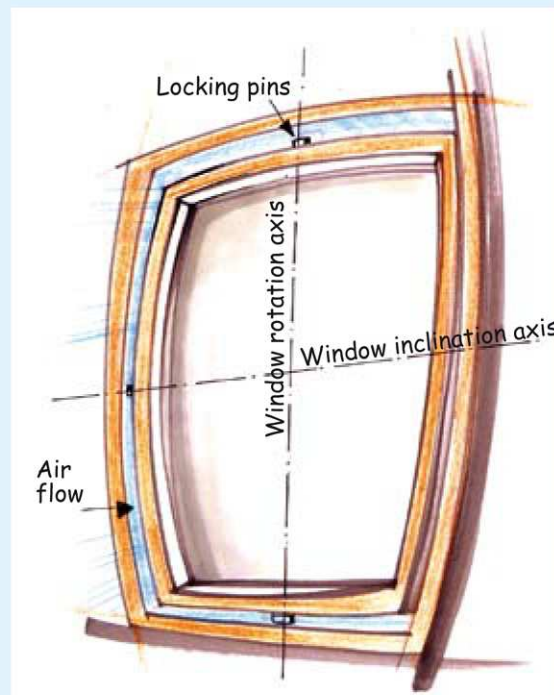

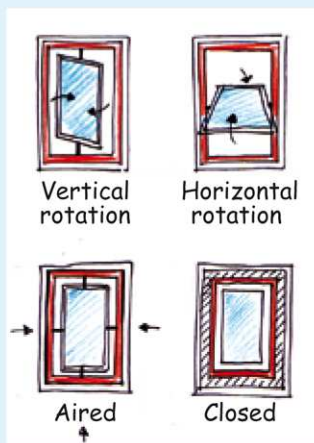

About Giuditta[®]

First came an intuition in 1989 that a window could be made to open both inwards and outwards, choosing which direction at the moment of use by selecting a rotation axis. After constant studies and experiments, in 2001 the GIUDITTA WINDOW was created, with the first samples, tests and supplies.

In 2004 all the certifications achieved attested to performance well up to all specifications.

The objectives set for the project had been reached and artisan production began.

In 2010 JUDIT became a complete system of windows – French windows – shop windows - monoblocs and curtain walls (by Isozaki Studio), new world patents were defined and industrial production began.

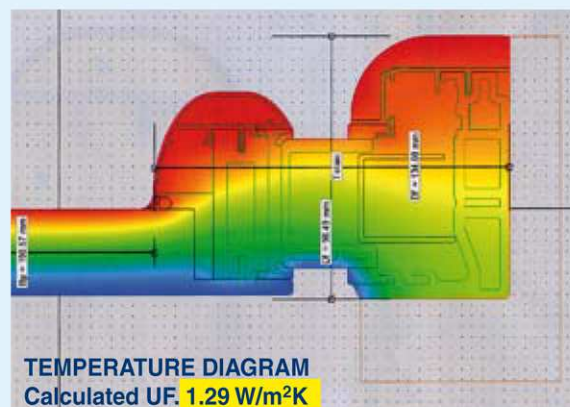

From June 2012 “onion” constructive solution

Giuditta[®] certifications

- **AIRTIGHTNESS:** **CLASS 4**
- **WATERTIGHTNESS (4 sq. m and 130 kg):** **CLASS 9A**
On a 4 sq. m window with 130 kg. of opening pane.
- **WIND RESISTANCE:** **CLASS C5**
